

UNDERSTANDING PEOPLE, PROCESSES, & TECHNOLOGY

Get an unbiased assessment of your IT performance, capabilities, and challenges helping you develop a solid roadmap for the future.

Bring a deeper understanding to your IT systems and risks by using our customized tools and expert resources. Enjoy best-practice process standards and a defined methodology to efficiently and effectively manage your information assets.

We'll Call it as We See It, and Move Goals Forward

Get an unbiased assessment of your IT performance, capabilities, and challenges using the proprietary tools and approach from Technology Partners. Your business will have all the information it needs to play to strengths, and clearly identify gaps and risks. Bigger picture than that—we will walk alongside you in moving all your business plans and goals forward as efficiently as possible.

Planning for Your Company's Future with Confidence

Uncovering issues to team performance and efficiency, and getting a clear plan to resolve and counteract those problems, add to the peace of mind for key stakeholders. With our proprietary seven step process, we'll help you establish clear priorities, define objectives, and develop a solid roadmap.

My experience with Technology Partners has always been top notch. I have never been disappointed when working with them.

CLIENT SUCCESS STORY

ALIGNING STRATEGIES, PROCESSES, AND IT

Global bank seeks help to meet federal regulatory reporting requirements for their business models, processes, and data.

The Challenge

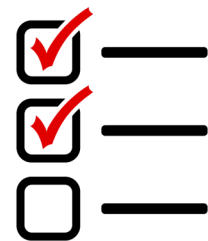

Our client, one of the world's largest financial institutions in the banking and capital markets industry, required a **comprehensive solution to report their business models, processes,** and data in order to meet federal regulatory reporting requirements and internal risk and compliance standards. Due to a lack of in-house specialists with the required skill sets, no proven approach and methodology for the necessary solution, and inadequate bandwidth to perform the engagement, they turned to Technology Partners to be able to comply with federal banking regulatory requirements and internal risk and compliance standards.

The Plan

An executive at the client familiar with Technology Partners asked us to provide an overview of how we could solve their dilemma. Ultimately, **we were awarded the project based on our capability, prior experience, and completion of our proposed solution.** We provided them the tools and an approach that allows them to identify any vital information within the enterprise and generate reporting in real-time. In providing them with a complete framework solution, the client's reporting goals were met.

The Results

With the client enjoying improved quality and timeliness of regulatory reporting, their ability to adapt to a constantly changing environment gives them ultimate flexibility. Due to the implemented framework and approach being tailored to the client's needs and environment, the assessment and tools were able to be **completed with limited interruption.**

"Technology Partners provided an unmatched quality product, under budget and ahead of schedule. The documentation framework Technology Partners developed was praised by both internal and external regulators as best-in-class. Furthermore, the project staff exhibited the highest level of professionalism and integrity."
