

As the tech agenda grows bigger and bolder, there's a new urgency to get today's high-potential and emerging technology leaders prepared to take on tomorrow's C-level roles. Strengthening their leadership capabilities and business acumen will require new skill development as well as the ongoing advice and support of experienced mentors and trusted peer networks.

The St. Louis Technology Leadership Experience (TechLX) provides an in-depth learning experience for a cohort of mid-level technology leaders and **Cohort IV is launching in early 2020!** Through a combination of classroom workshops, networking, peer discussions, mentoring, and self-awareness, the program does more than build the next generation of technology leaders; it creates a powerful technology leadership community in St. Louis.

MATURE YOUR ORGANIZATION

Leading in a Technology Organization (1–Day)

Focus on topics such as Purpose, Goals and Vision, Inspiring Others, Emotional Intelligence, and Decision Making—some of the most critical skills of leadership.

Consulting Skills: Becoming a Trusted Advisor (1.5–Days)

Foster influencing skills, increase their communication skills, and build deeper, trust-based relationships with clients, your team, and others in your organization.

Marketing IT's Value (1.5–Days)

Learn a framework for communicating the value of a product or service, the IT organization, or yourself as a leader. This session will change the way you communicate in order to build support and buy-in by focusing on value rather than technical features.

"I cannot thank you enough for all that you are doing for technology leadership throughout the region. I am grateful to have had the privilege to learn and develop through this program. I cannot overstate the impact that you and your team have had on my career trajectory. Thank you for inspiring and challenging me."

—STL TechLX Participant

GET INVOLVED IN THE NEXT COHORT:

- Host a workshop or networking event at their location
- Sponsor mid-level managers in your organization to participate in the program or become a mentor

From Boeing and Mastercard, to SLU and Ameren, join an inclusive and diverse collection of companies that are changing the way technology is used in St. Louis.
